PNAI Interactive Session

IGF in the Global AI Dialogue: Role and Impact

3.6.2025

IGF Internet Governance Forum

POLICY NETWORK ON ARTIFICIAL INTELLIGENCE

Welcome & Goals of the Session

Amrita Choudhury, Audace Niyonkuru,
Xiao Zhang, Maikki Sipinen

IGF Internet Governance Forum

POLICY NETWORK ON ARTIFICIAL INTELLIGENCE

Q1 AI collaboration inside the IGF

How to best collaborate on AI within the IGF community, how to create better synergies between IGF AI activities? What is the role PNAI could play?

Q2 IGF's role and impact on AI

What is IGF's unique role in global AI governance? How could we maximize IGF's impact on AI topics? How to position the IGF vis-à-vis other international fora, beyond the UN (G7, OECD, etc.) and to engage with them?

PLEASE STAY MUTED WHEN YOU ARE NOT SPEAKING

Policy Network on AI (PNAI)

"IGF could be used as a platform for developing cooperation mechanisms on AI. A policy network on artificial intelligence could be considered for the upcoming work streams in order to review the implementation of different principles with appropriate tools and metrics." – IGF 2022 Addis Messages

"Multistakeholder consideration of digital governance and the data-driven digital economy should not be confined to experts but should find ways to engage and build on the experience of all people. An inclusive approach would ensure that diverse perspectives contribute to shaping policies that affect the broader population." - IGF 2023 Kyoto Messages

PNAI GOALS

- Institutional home for global policy research, debate and recommendation-making to address AI governance, policy responses and related aspects of data governance.
- Inclusiveness of voices that are usually marginalised from AI policy debates. Diversity, equity and inclusion (DEI).
- Built on the IGF's global reach and its leadership in convening a multistakeholder platform for open and inclusive policy discussions on Internet governance and digital policy matters
- Connection to the IGF and other IG processes to facilitate more inclusive multilateral AI governance through a bottom-up approach.

Policy Network on AI (PNAI)

ACTIVITIES

Annual Policy Reports

(2024) *The AI Governance We Want, Call to action: Liability, Interoperability, Sustainability & Labour*

(2023) *Strengthening multistakeholder approach to global AI governance, protecting the environment and human rights in the era of generative*

Open consultations

2025 KEY AREAS

- Continue engaging in AI discussion Forums
- Provide concrete ideas and plan on how the IGF can integrate GDC implementation in its work going forward from 2026 pertaining to AI

ENGAGEMENT AND OUTREACH

Encourage widespread participation from all stakeholder groups, promote participation of representatives from the Global South

Collaborations with special focus on UN agencies and collaborating organisations

Leverage the extensive network of NRIs and DCs

Present progress of the work at key junctions of IGF (IGF Main sessions in 2023, 2024, 2025)

Share learnings and progress at relevant conferences and other thematic events outside of the IGF.
